

Smart Nursery – smart technology by Motorola at Kind + Jugend trade fair

Sound and light projection, temperature, humidity, video and audio monitoring, analytic functions including sleep analysis and growth tracking – Motorola Smart Nursery devices are smart on their own, but even smarter together

Cologne, 14. September 2016 – Binatone, the official licensee of Motorola Mobility, will showcase its state of the art Motorola Smart Nursery collection at Kind + Jugend in Cologne. Visitors can experience the full capabilities of the new connected products for modern families from September 15.-18 at booth E018 in hall 11.2.

A major advantage of Motorola Smart Nursery is that each product can be accessed and controlled remotely via a single app platform on connected smartphone or mobile devices. All Motorola Smart Nursery products can function individually or work together to create the ultimate nursery ecosystem.

Smart Nursery 7: the portable connected Wi-Fi video baby monitoring camera comes with a 7" high definition touch screen viewing unit and offers a number of smart analytic functions. The camera provides two way communication, snap shots, video recording and sharing, remote pan, tilt and zoom, infrared night vision as well as a baby care timer for feeding, changing & sleep monitoring. Smart Nursery 7 tracks temperature, humidity, sound and movement for real time monitoring for baby sleep analysis

The portable connected Wi-Fi video baby monitoring camera **Smart Nursery Cam** with smart analytics is part of the Smart Nursery 7 but can also be purchased separately.

The **Smart Nursery Dream Machine** combines a connected sound and light projector with audio monitoring and two way communication. Parents can choose from 3 different animated light shows and download lullabies from their smartphone or tablet.

The **Smart Nursery Baby & Me Scale** is a connected scale with baby growth tracking and weight history functions.

The **Smart Nursery Humidifier+** with air and water filtration helps to control the humidity level in the nursery via smartphone or tablet - to improve babies breathing and quality of sleep.

The **Smart Nursery Alarm Sensor** monitors nursery windows and doors, baby gates and more and sends real time alerts to connected smartphones or tablets.

VerveLife for active Parents

In addition to the full range of Wi-Fi® connected and digital video solutions for babies, visitors will also be able to experience the latest connected audio and video solutions for active parents. The VerveLife by Motorola series of true wireless audio and video devices is ideal for sports or family outings and holiday trips. The VerveCam livestreaming camera will showcase at the event alongside accessories for baby, family and home use. All products in this series are also available in a water resistant version and connect to the Hubble app, the largest platform for connected of video cloud services.

iNanny Communicator

Binatone will also be showcasing their new iNanny Kids Communicator, a smart mobile device created with 6 – 10 year olds in mind. Kids will love the music, videos and educational materials they can access from the web, while parents can track their kids location, communicate via voice and constantly control what apps and content their kids can access.

There will also be a new range of accompanying audio wearables on display to go alongside the new device.

About Binatone

Binatone is a leading global manufacturer of innovative IoT, smart home and consumer electronic devices for the baby, pet, home, personal audio and lifestyle camera categories. As well as selling products under its own name, Binatone is a licensee of Motorola and AEG. Binatone products are now sold in over 50 countries.
